VASSEL GOLEYU

Informatics Student | Full Stack Developer | Mobile & AI Security

Tangerang, Indonesia | vassel.jgo@gmail.com
linkedin.com/in/vassel-goleyu | github.com/sellebeww

PROFILE

Informatics student at Universitas Multimedia Nusantara who ships real software across web, mobile and AI. Builds secure, scalable web apps with Laravel, React and REST APIs, and explores AI and smart-contract security on the side. Leads student organizations and events reaching 500+ participants, so ideas get built and delivered on time.

EDUCATION

Universitas Multimedia Nusantara (UMN), Bachelor of Informatics | Aug 2024 - Aug 2028 (Expected)

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, Kotlin, C#, C, Ruby, Solidity, HTML5, CSS, SQL
Web & Backend: Laravel, React, Node.js, Rails 8 (Hotwire), .NET Core, REST API, PWA (offline-first), RabbitMQ
Mobile & Data: Android (Kotlin, Jetpack Compose), Flutter, MySQL, PostgreSQL, Supabase, Unity
AI & Security: Machine learning (ensemble learning, clustering, CNN), LLM guardrails, smart-contract security (EVM), web vulnerability research (IDOR), networking protocols
Tools: Git, GitHub, Figma, UI/UX design

EXPERIENCE

Frontend Developer, BEM UMN | Nov 2026 - Present
- Build and maintain responsive, user-focused front-end interfaces for student-body digital platforms.

Full Stack Web Developer, UMN Medical Center | Feb 2025 - Dec 2025
- Built and maintained digital platforms with Laravel (PHP), JavaScript, HTML/CSS and MySQL.
- Integrated REST APIs and JSON, shipped responsive UIs, and implemented authentication and authorization with a focus on security and performance.

Student Activities Supervisor, BEM UMN | Jan 2026 - Present
- Supervise Mister & Miss UMN, a major student activity: designed the year's full theme concept and oversee the Executive Committee to keep every program on the Grand Design.

President, Duta Anti Narkoba UMN | Jan 2025 - Dec 2025
- Led a student organization running Anti-Narkoba Week, school outreach and Awarding Night, in coordination with health sectors and campus leaders.

Event Organizer, HMIF UMN | Sep 2024 - Nov 2025
- Managed three flagship Byte 2025 programs (tech exhibition, sports competition, grand finale) and built six interactive games for Infinite, engaging around 500 students.

PROJECTS

- **falsify-guardrail** (Python): guardrail that confirms exploits in LLM-generated smart contracts before they are trusted.
- **assay-evm** (Python): checks whether a Solidity patch really fixes an exploit or only passes the existing tests.
- **BUNDA-SIAGA** (Kotlin): offline Android app for pregnancy and postpartum danger signs, with SMS referrals.
- **CAPIRA** (TypeScript): offline-first research prototype for camera-based capillary refill measurement.
- **Smart-Toko** (Flutter, Supabase): voice bookkeeping app for small shops, built in the Ignite Full program.
- **HakData** (TypeScript, RabbitMQ): helps citizens claim their personal-data rights under Indonesia's PDP law.

ACHIEVEMENTS

- Gold Medalist, National Biology Competition (Sigma Science Olympiad and Olimpiade Sains Siswa)
- Gold Medalist and 1st Runner Up, National Geography Competition (Olimpiade Soshum and Olimpiade Sains Siswa)

CERTIFICATIONS & LANGUAGES

C# and .NET Core Essentials; Leader 101: Effectively Manage Your Team; Leadership Training; Emotional Intelligence. Indonesian (native), English (professional working proficiency).
